

- Mid-Term Impact Analysis -

14 transnational research collaborative projects

102 research teams from 20 European Member States and Turkey. Additional partners from Australia and USA

€16 milion total funding = EC + National/Regional funding agencies

European transnational cooperation

605 researchers in mobility

project meetings, field work, training, study visits, dissemination actions, development of products

Impact

170,5 New Jobs

Dissemination of scientific/technical literature

38 publications

+

33 submitted

15 in preparation

18 Scientific and Innovation Products

Artificial floor; Cow toilet

Floating farm

Genetic markers

Multi-sensor array

Image detection system

Tools for efficiency and carbon; databases

Blood biomarkers....

321 Dissemination activities

100% of the projects used dissemination tools: websites, partners websites, leaflets, newsletters/brochures, social media

Target stakeholders

Researchers & farmers

National
European
International

Local, Regional,
National and
European

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 696231
